

Application No. Unknown  
Preliminary Amendment dated July 21, 2003

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

Claims 1-9 (canceled)

Claim 10 (new): A method for preparing a united flexible exothermic medium, said method comprising:

    mixing an exothermic agent which generates heat in contact with air and a water-absorptive polymer to form a first mixture;

    mixing the first mixture with an alcohol which is selected from the group consisting of ethanol, isopropyl alcohol, ethylene glycol, propylene glycol and glycerin to form a second mixture; and

    subjecting the second mixture to pressure.

Claim 11 (new): A method for preparing a heating element which has a united flexible exothermic medium, said method comprising:

    mixing an exothermic agent which generates heat in contact with air and a water-absorptive polymer to form a first mixture;

    mixing the first mixture with an alcohol which is selected from the group consisting of ethanol, isopropyl alcohol, ethylene glycol, propylene glycol and glycerin to form a second mixture; and

    subjecting the second mixture to pressure.

Claim 12 (new): The method according to claim 10 wherein said pressure is 100-8000 kg/cm<sup>2</sup>.

Claim 13 (new): The method according to claim 12 wherein said pressure is 840-8000 kg/cm<sup>2</sup>.

Application No. Unknown  
Preliminary Amendment dated July 21, 2003

Claim 14 (new): The method according to claim 10 wherein a second polymer is added to said first mixture of said exothermic agent and said water-absorptive polymer.

Claim 15 (new): The method according to claim 11 wherein said pressure is 100-8000 kg/cm<sup>2</sup>.

Claim 16 (new): The method according to claim 11 wherein said pressure is 840-8000 kg/cm<sup>2</sup>.

Claim 17 (new): The method according to claim 11 wherein a second polymer is added to said first mixture of said exothermic agent and said water-absorptive polymer.

Claim 18 (new): The method according to claim 11 further including the step of molding said medium in the shape of a flat layer with two main surfaces, and disposing an adhesive layer on one said surface.
